Project Title: Ambivalent Love

Project Guide:

Prof. Ramesh Narayana Rao

Prof. Venugopal VG

My work is about understanding the ideas that developed over time and the different theoretical perspectives of various artists who have understood the documentation of previous times and have intellectual thinking for bringing the new taste and styles as well as cultural thinking. So with that inspiration, I have also tried a similar order and tried to understand the meaning of the art genre which has made me understand the visual language and what is important for any evolution and changes that are required in the art world. And understanding the space and dimension shows the camera's inefficiency and also the requirement of a drone for capturing 360°. It is possible if the experiment with harmony, flow, and visualization of form to represent the image.
